It is not possible to consistently time the sectoral winners and there may be prolonged cycle of outperformance and under performance. Furthermore, there may be a good company in an under-performing sector and an average company within the out-performing sector. Hence, taking top-down bets on sectors may not always deliver good consistent results.

Taking a skewed bet on a particular style can result in extreme results

Following or Skewness to a particular style may increase portfolio volatility and can adversely impact portfolio performance on risk adjusted basis

Challenges with Style or Theme Bias Approach

Some Past Instances

Value Style Under-Performed for 3 Years

- Before the come back in CY 2021, for **three consecutive calendar years (2018, 2019, 2020)**, Value Style underperformed most of the other styles of fund management. Delivering poor investor experience.

Roller-Coaster Ride with Quality Style

- Quality Style **worked well in CY 2018 and CY 2020** but did poorly in CY 2017 and CY 2019.

Domestic v/s Export Oriented Theme

- Sectors like IT Services and Pharma were among the **worst performing sectors in CY 2016 and 2017** compared to broader market. Subsequently, **IT Services outperformed** most of the other sectors in **CY 2018, 2020 and 2021**, and Pharma outperformed in 2020.

Defensives v/s Cyclical

- Some of the **Defensive Sectors did well in CY 2020** but in **CY 2021** many of the Cyclical Sectors performed relatively better than broader market and **Defensive Sectors were among the laggards**.

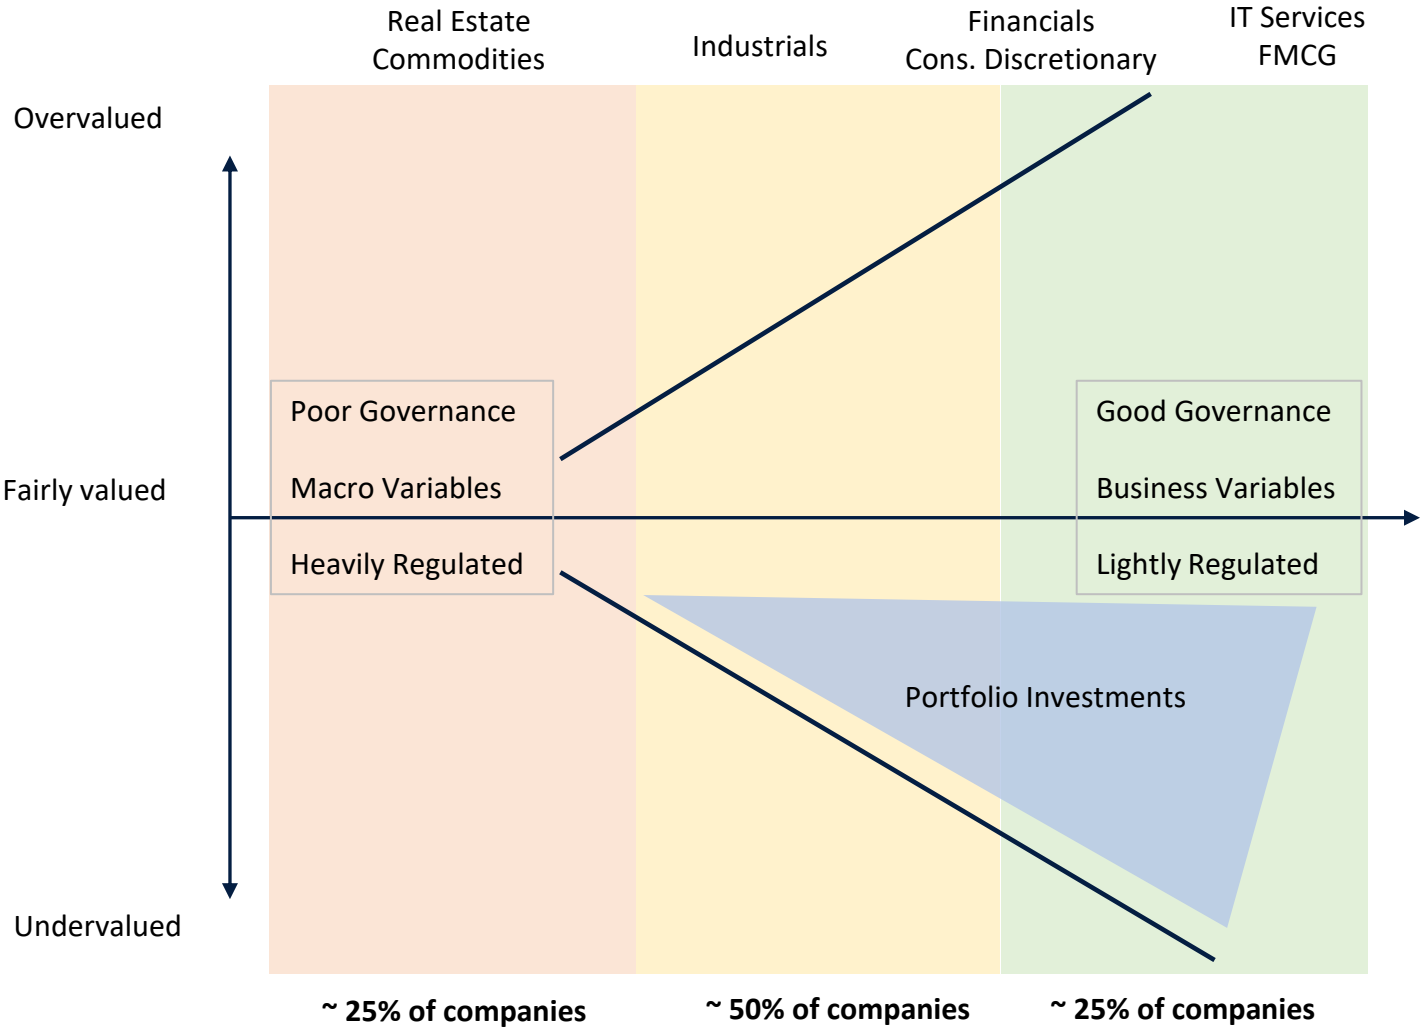

No particular **Style** performs consistently every year. Likewise, **Sector and Market Cap** performance keeps rotating year on year. Furthermore, there may be prolonged cycle of out performance and under performance.

Hence, a **Balanced Portfolio** with **blend** of these **factors** can help improving consistency of the performance.

Opportunity Funnel

No sanctity of cash flows or valuations of poorly governed companies

Note:
Graphical representation is for illustration purpose only and not supposed to be precise or accurate.

For example, not all real estate companies are poorly governed, and not all IT Services companies are well-governed.

Creating Synergies by Acquiring the Innovators

Companies within the company

Large companies often acquire their service providers or disruptors or innovators in their sector, often resulting in better synergies. This also helps in talent acquisition.

Established Leaders: House of many Smaller Businesses

Embedded Value of Subsidiaries, Associates and JV

An Auto Company (19)

A Paint Company (24)

A Private Bank (15)

**An Industrial
Conglomerate (113)**

**Generally, such embedded value gets unlocked through Spin-offs, Carve-outs, Divestments.
The value creation may depend on type and objective of demerger.**

Example : Value Unlocking through a Demerger

Company Name	CAGR (%) (23-May-2008 to 30-Sep-2022)
Holding & Investment Company	21.2%
Auto Company	22.0%
NBFC	27.9%
Combined Value*	24.2%
Nifty 50 TRI	10.4%

Past performance may or may not be sustained in the future.

In a big corporate structure with multiple businesses, a demerger of disparate businesses unlocks the financial and management bandwidth required for the respective businesses to grow and may result in better value unlocking.

Scheme of Arrangement of Demerger: A parent company was demerged into three entities; Holdings and Investment Company, Auto Company and NBFC.

*Combined Value is Combined return of Holding and Investment Company, Auto Company and NBFC as on 30-Sep-2022, if invested in Parent Company on 23-May-2008.

Large Cap Companies' Revenue Break-up

Many of the Large Cap Companies not only serve Domestic market but international market as well. Nearly one fourth of their revenue comes from outside India. Making them geographically more diversified.

Many a Times Leaders Gain from Disorder

Annual Capex Breakdown between Large, Mid and Small Caps

During the last few years of uncertainties like Demonetisation, GST Implementation, NBFC Crisis, Covid, etc., Large Cap Companies' share in total Capital Expenditure has increased substantially.

SMID Segment is Less Researched as Compared to Large Cap – Potential for Attractive Valuation

Thus, in-house research capabilities matters a lot in identifying winners in SMIDs

Among peers, India SMID universe is among the most well-diversified

- The Indian market has the most heterogeneous composition at a sectoral level, and within that it is the most diverse at company level
- India has a well distributed investible universe of companies by index weights

Higher Opportunities Exist in SMID Segment

Broader spectrum of undervaluation and hence higher investment opportunities exist in small-cap and mid-cap as compared large-cap stocks

SMID Segment: There can be Large Winners... and Losers too (2017-2022)

Mid Cap Segment

Small Cap Segment

Only handful Mid Cap stocks managed to turn into Large Caps, similarly only few Small Cap could turn into Mid Caps. This shows **Stock Selection** plays a vital role in generating good performance in SMID segment.

Avoiding Corporate Governance Disasters is Equally important

Stock	% institutional holding in June 2018	Subsequent Stock Price Correction
A Travel Company	40.6	-99%
Housing Finance Company	29.0	-97%
Jewellery Business	22.0	-96%
Services Company	27.0	-93%
A Private Sector Bank	67.7	-96%

- In the absence of adequate governance, a business may be great but only for the controlling shareholders and not for minority investors
- The best way to make money from such companies is by avoiding them

SMID Segment : Many Opportunities but..

In Safer Sea

Lots of Fishermen + Few Fishes to Catch + Relatively Safer Environment

Large-Cap

Generally, in Large-Cap space many analysts cover the same stocks, which reduces the potential alpha generation

In Deep Sea

Few Fishermen + More Fishes + Risk of being attacked by Sharks

SMID-Cap

Space provides lots of alpha generation possibilities but with higher potential risks as well

Large Investment Team

can help to identify opportunities available in SMID segment.

Internal Forensic Team

to create Negative List of stocks can help in avoiding large Corporate Governance issues.

Investment Approach	WhiteOak India Business Leaders PMS		
Structure	Discretionary Portfolio Management Services		
Portfolio Manager	White Oak Capital Management Consultants LLP		
Investment Objective	The objective of the strategy is to achieve long term capital appreciation by primarily investing in listed securities in India. The investment strategy is long only with a bottom up stock selection approach. The investment philosophy is, that outsized returns are earned over time by investing in great businesses at attractive values. A great business, in our view, is one that is well managed, scalable, and generates superior returns on incremental capital. Valuation is attractive when the current market price is at a substantial discount to intrinsic value.

Evolving dynamics of external sector

Vulnerability to oil prices lower....

As IT exports have surpassed the oil import bill

- For every US\$10/bbl increase in crude oil prices, it is estimated that CAD to GDP increases by 40bps
- Over the years, growing software exports and narrowing of non-oil trade deficit due to rising exports in engineering goods, electronics and textiles have reduced India's vulnerability to higher crude oil prices
- Initiatives like Production Linked Incentive (PLI) scheme likely to further reduce import dependency in manufacturing sector

Make in India

Indian speciality chemicals industry positioned strongly to win global market share

- MNCs seek to diversify procurement away from China
- **Covid has exposed global supply chain vulnerability**
- China's erstwhile competitive advantages of labour cost, and lax compliance are weakening

Macro- Shacro

20-20 from 2020: The futility of predicting investment returns based on macroeconomic worries and events

Lesson #1

- The usual perennial macroeconomic worries of the well-known unknowns variety are a colossal waste of time
- They hardly influence the future returns from equity markets, if any at all

Lesson #2

- Nobody has a crystal ball to forecast cataclysmic risk events of the unknown unknown variety, ex: the pandemic
- Market implications remain unpredictable even if one were bestowed with perfect prior knowledge

Lesson #3

- Investment decisions bereft of bottom up analysis, and instead driven by macro considerations, are fraught with high risk of substantial absolute and relative losses

The value of the market at any time is present value of aggregate perpetual future cash flows

The market is fairly valued at all times

Relevance of Macro

- View **macros** as source of random risks, **not as opportunity to add alpha**
- Consciously **avoid top-down misadventures** – market timing, sector rotation
- Stay **fully invested**, with a bottom up approach to investing in great businesses at attractive valuations
- Maintain a balanced portfolio construction approach at all times
