Outsized returns can be earned over time by investing in great businesses at attractive valuations

$$\text{Value of a business} = \frac{CF}{r - g}$$

## Aim to avoid businesses with weaker characteristics

Poor corporate governance	Weak returns on incremental capital	Substitution or obsolescence risk
<p>Siphoning of cash or value</p> <p>Manipulation of stock prices</p> <p>Unethical business practices</p> <p>Misaligned interests</p> <p><u>Examples</u></p> <p>Numerous across sectors</p> <p>Certain commodity companies</p>	<p>Excessive competition in capital-intensive industry</p> <p>Misallocation of capital</p> <p>Empire building</p> <p><u>Examples</u></p> <p>Conglomeration without capabilities</p>	<p>Existential threat from technological developments</p> <p><u>Examples</u></p> <p>Print media from online</p> <p>Wind energy from solar</p> <p>Combustion engine from electric vehicles</p>

*Beware of value traps*

We distil from a broad investible universe

We aim to avoid misgoverned companies

*He that lieth down with dogs shall rise up with fleas – Benjamin Franklin*

We aim to adhere to a time tested analytical framework in a disciplined manner

*Keep perspective of business cycles, rather than accounting years*

# Portfolio Construction & Risk Management

We aim to ensure performance is a result of skill rather than chance

- **Balanced portfolio** of select companies agnostic to benchmark
- Focus on ensuring alpha generation is a function of **stock selection**
- Aim to consciously **avoid market timing** or **sector rotation** or other such top-down bets
- Understand, monitor, and aim to contain **residual factor risks** that are **by-product of stock selection**
- Typical exposure limits
  - Single stock: 10% at market value
  - Single promoter group: 25%

*We never forget that in macro, we only have hunches: in the micro, we can develop justifiably deep conviction*  
- Seth Klarman

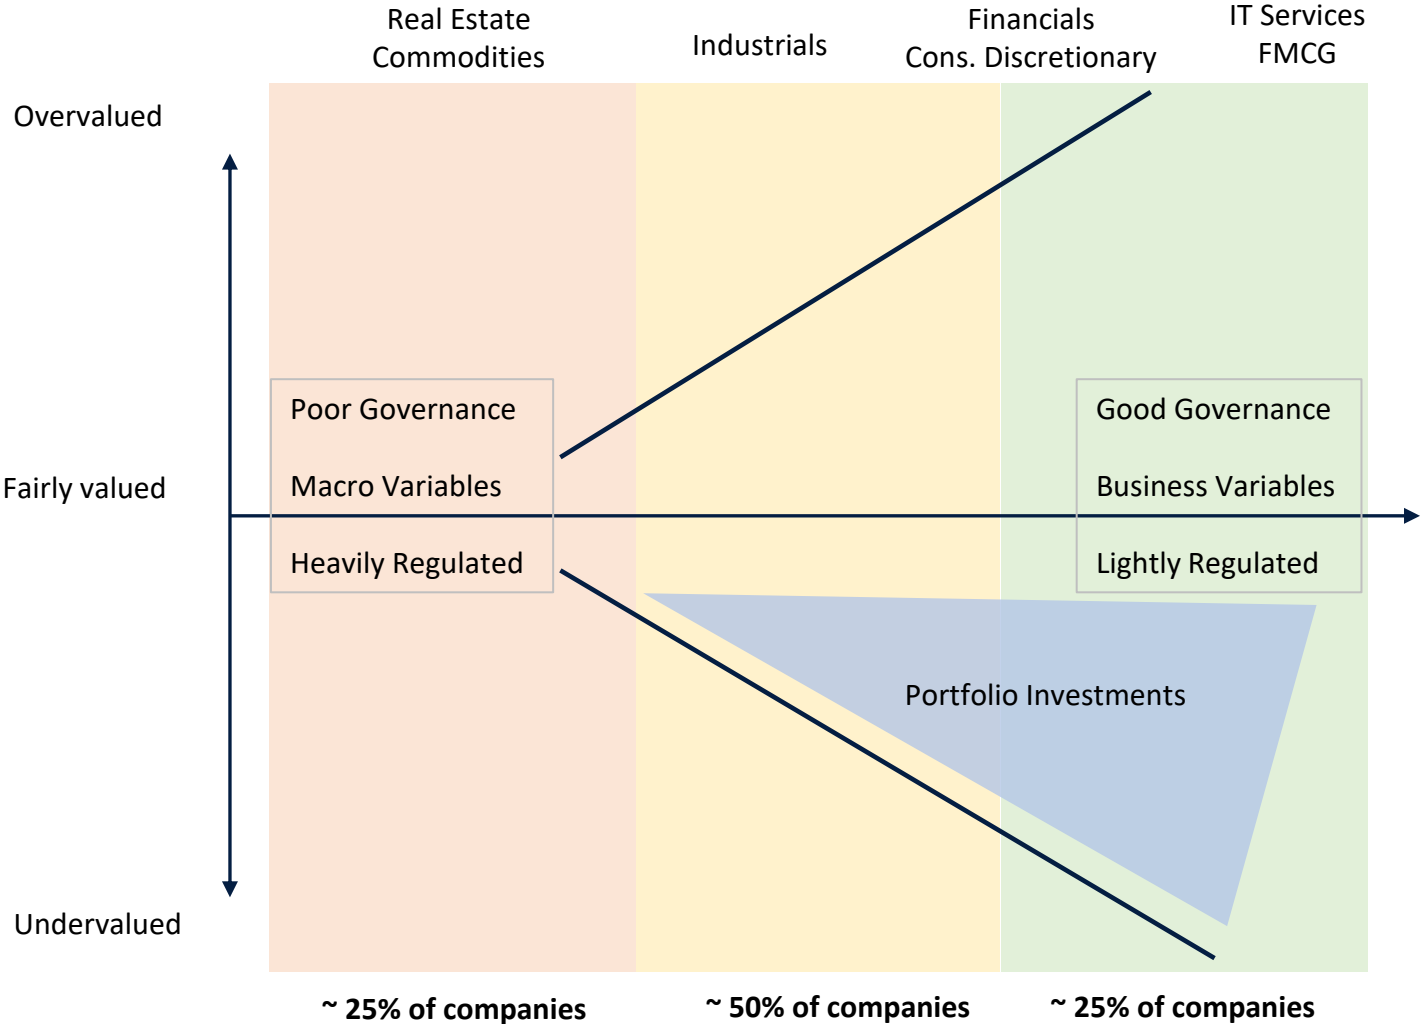

# Opportunity Funnel

Higher inefficiencies in mid and small cap

# Opportunity Funnel

No sanctity of cash flows or valuations of poorly governed companies

*Note:*  
Graphical representation is for illustration purpose only and not supposed to be precise or accurate.

*For example, not all real estate companies are poorly governed, and not all IT Services companies are well-governed.*

# Structure and Key Terms

Investment Approach	White Oak India Top 200 PMS		
Structure	Discretionary Portfolio Management Services		
Portfolio Manager	White Oak Capital Management Consultants LLP		
Investment Objective	The objective of the strategy is to achieve long term capital appreciation by primarily investing in top 200 'listed securities' by market capitalisation in India. The investment strategy is long only with a bottom-up stock selection approach. The investment philosophy is, that outsized returns are earned over time by investing in great businesses at attractive values. A great business, in our view, is one that is well managed, scalable, and generates superior returns on incremental capital. Valuation is attractive when the current market price is at a substantial discount to intrinsic value.		
Minimum Investment	INR 50 lakhs		
Investment Amount & Management Fees	INR 50 lakhs – INR 2 crores	INR 2 crores – INR 5 crores	> INR 5 crores

## Case Studies\*

\*The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

## infoedge

### India's leading classifieds company

- Infoedge's Naukri.com is India's dominant online jobs portal with 70%+ traffic share. It also owns 99acres.com which is the No. 1 online real-estate classifieds portal with 50% traffic share
- India's low internet penetration provides a long runway of growth for these dominant classified businesses
- Management has an excellent track record of execution. It has also made investments in India's leading food delivery company (Zomato), and India's top online policy aggregator (Policybazar)

\*The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

## Emerging leader in fluorination

- Established in 1967, NFIL has successfully transitioned its business model from a domestic focused, commoditised inorganic fluoride manufacturer to a well-established specialty chemical and CRAMS player globally
- Fluorination is one of the fastest growing chemistry globally owing to its lipophilic properties which increases the potency and efficacy of formulations. Development capabilities (esp. multi-step) in fluorine have a long gestation period and hence there are only a handful of players in fluorine chemistry globally
- NFIL has seen renewed aggression under the leadership of Radhesh Welling who has more than 25 years of experience in the speciality chemicals industry. Post his joining, the management has created the right incentive structure for employees at all levels to ensure value accretive growth

# Evolving dynamics of external sector

## Vulnerability to oil prices lower....

## As IT exports have surpassed the oil import bill

- For every US\$10/bbl increase in crude oil prices, it is estimated that CAD to GDP increases by 40bps
- Over the years, growing software exports and narrowing of non-oil trade deficit due to rising exports in engineering goods, electronics and textiles have reduced India's vulnerability to higher crude oil prices
- Initiatives like Production Linked Incentive (PLI) scheme likely to further reduce import dependency in manufacturing sector

# Guaranteed Real Loss vs Compounding Gains

## Fixed deposit vs Equities

Equity returns since 1985

Source: Bloomberg

## Near term risks

- Uncertainty related to evolving global geo-political situation
- Sharp reversal in global markets
- Sharp spike in oil prices

## Other commonly held concerns

- Weak infrastructure
- Geo-political tensions with neighbours
- Social unrest due to wealth disparity or caste system

<sup>1</sup>Note that these are not all the risks to the investment case but only a high level summary of certain key risks.

## Macro- Shacro

20-20 from 2020: The futility of predicting investment returns based on macroeconomic worries and events

### Lesson #1

- The usual perennial macroeconomic worries of the well-known unknowns variety are a colossal waste of time
- They hardly influence the future returns from equity markets, if any at all

### Lesson #2

- Nobody has a crystal ball to forecast cataclysmic risk events of the unknown unknown variety, ex: the pandemic
- Market implications remain unpredictable even if one were bestowed with perfect prior knowledge

### Lesson #3

- Investment decisions bereft of bottom up analysis, and instead driven by macro considerations, are fraught with high risk of substantial absolute and relative losses

The value of the market at any time is present value of aggregate perpetual future cash flows

The market is fairly valued at all times

## Relevance of Macro

- View **macros** as source of random risks, **not as opportunity to add alpha**
- Consciously **avoid top-down misadventures** – market timing, sector rotation
- Stay **fully invested**, with a bottom up approach to investing in great businesses at attractive valuations
- Maintain a balanced portfolio construction approach at all times
