Outsized returns can be earned over time by investing in great businesses at attractive valuations

$$\text{Value of a business} = \frac{CF}{r - g}$$

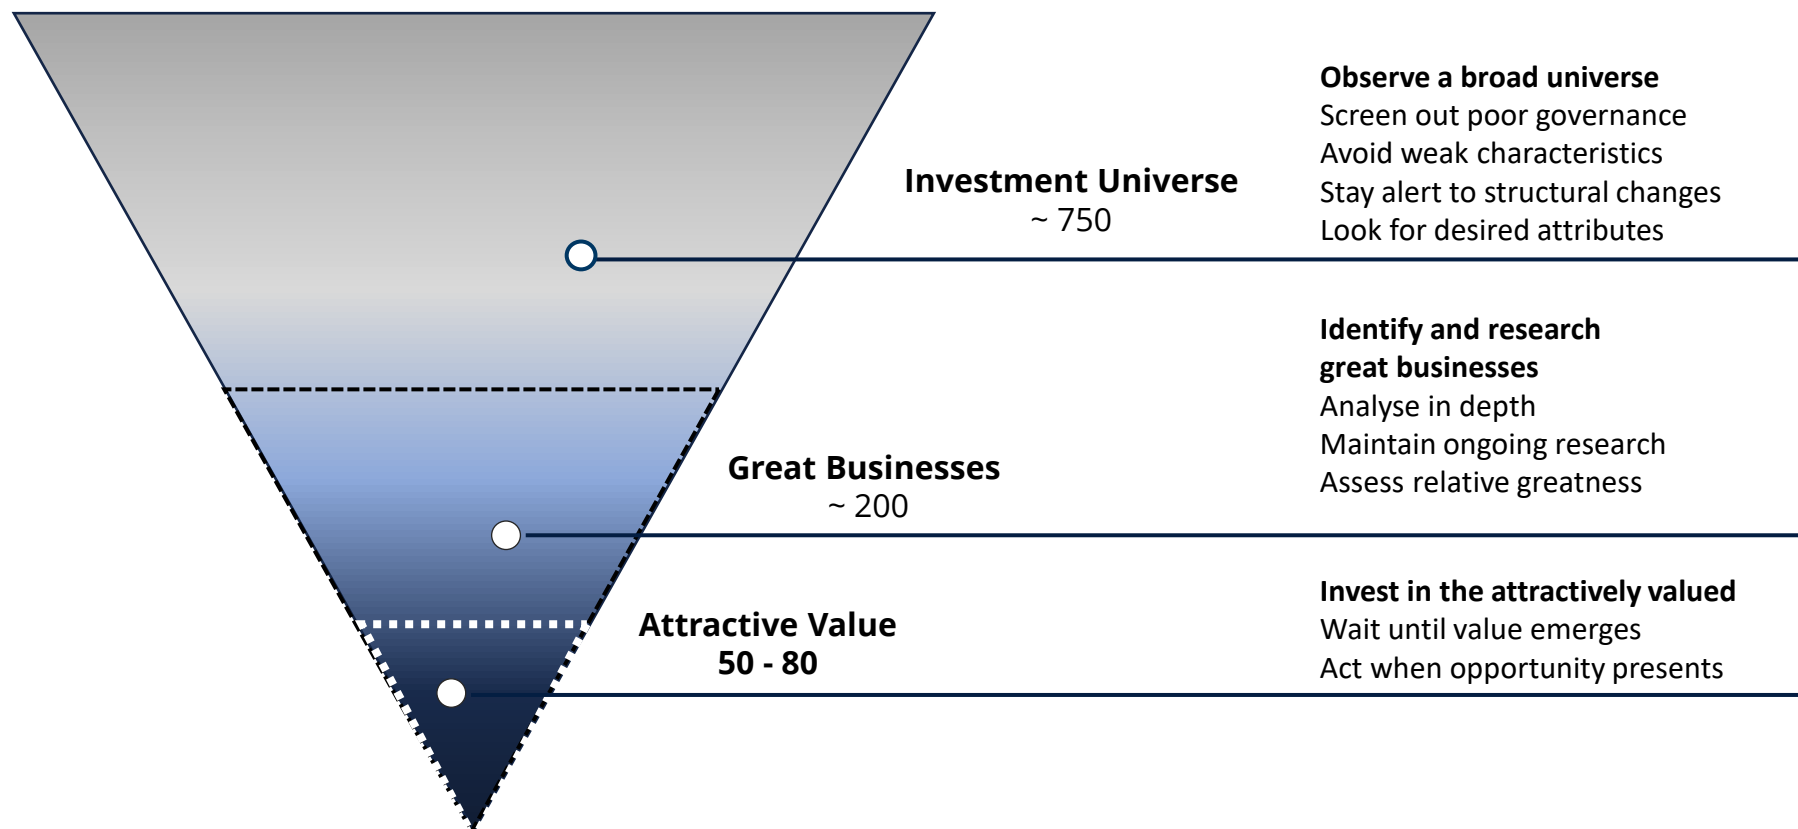

Aim to avoid businesses with weaker characteristics

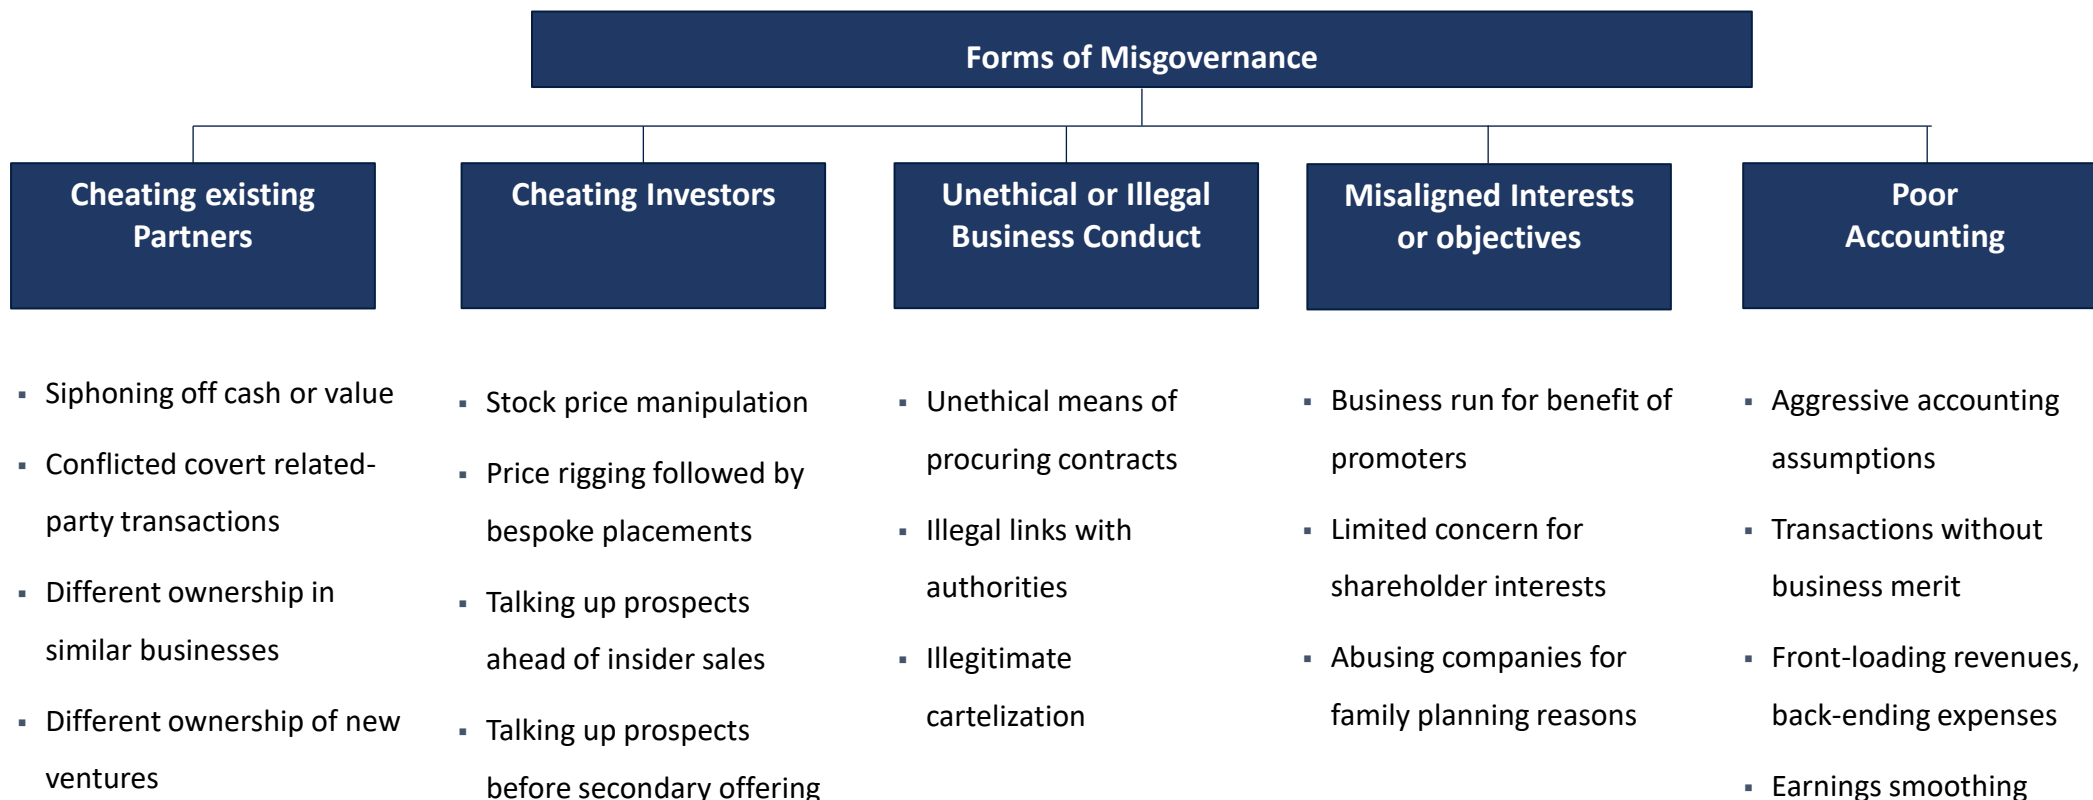

Poor corporate governance	Weak returns on incremental capital	Substitution or obsolescence risk
<p>Siphoning of cash or value</p> <p>Manipulation of stock prices</p> <p>Unethical business practices</p> <p>Misaligned interests</p> <p><u>Examples</u></p> <p>Numerous across sectors</p> <p>Certain commodity companies</p>	<p>Excessive competition in capital-intensive industry</p> <p>Misallocation of capital</p> <p>Empire building</p> <p><u>Examples</u></p> <p>Conglomeration without capabilities</p>	<p>Existential threat from technological developments</p> <p><u>Examples</u></p> <p>Print media from online</p> <p>Wind energy from solar</p> <p>Combustion engine from electric vehicles</p>

Beware of value traps

We distil from a broad investible universe

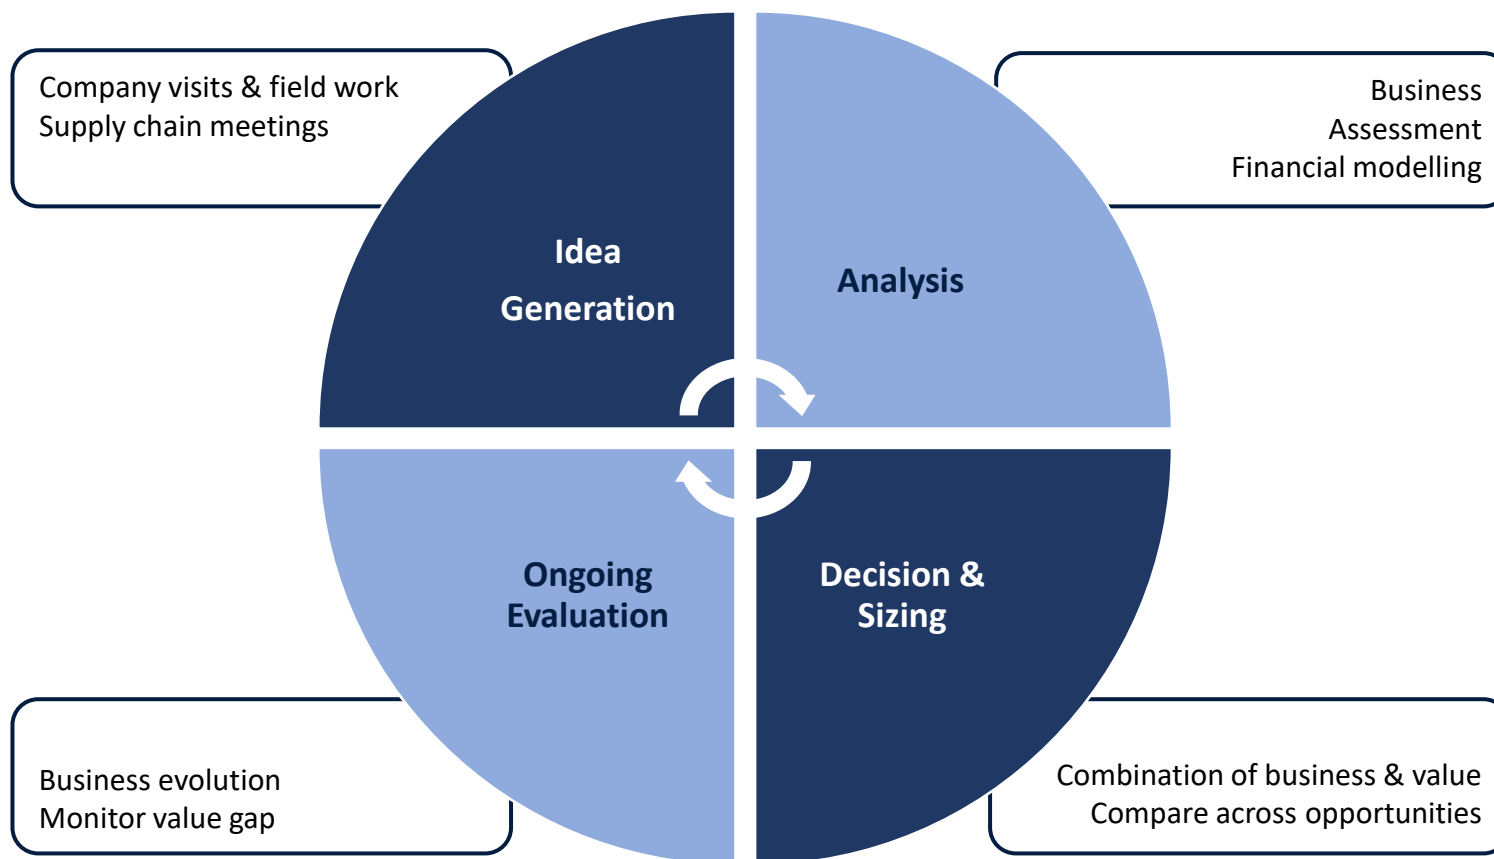

We aim to avoid misgoverned companies

He that lieth down with dogs shall rise up with fleas – Benjamin Franklin

We aim to adhere to a time tested analytical framework in a disciplined manner

Keep perspective of business cycles, rather than accounting years

Portfolio Construction & Risk Management

We aim to ensure performance is a result of skill rather than chance

- **Balanced portfolio** of select companies agnostic to benchmark
- Focus on ensuring alpha generation is a function of **stock selection**
- Aim to consciously **avoid market timing** or **sector rotation** or other such top-down bets
- Understand, monitor, and aim to contain **residual factor risks** that are **by-product of stock selection**
- Typical exposure limits
 - Single stock: 10% at market value
 - Single promoter group: 25%

We never forget that in macro, we only have hunches: in the micro, we can develop justifiably deep conviction
- Seth Klarman

Opportunity Funnel

Higher inefficiencies in mid and small cap

Opportunity Funnel

No sanctity of cash flows or valuations of poorly governed companies

Note:
Graphical representation is for illustration purpose only and not supposed to be precise or accurate.

For example, not all real estate companies are poorly governed, and not all IT Services companies are well-governed.

Case Studies*

*The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

One of India's leading Non-Banking Finance Companies (NBFCs)

- Cholamandalam Investment and Finance (CIFIC) is a non-banking financial company (NBFC) belonging to the Chennai-based Murugappa Group. It primarily operates in vehicle finance (including CVs, PVs, 2W and 3Ws), home equity, and affordable home loans category. In terms of customer profile, it caters predominantly to single truck owners and small fleet owners, self-employed non-professionals and MSME businesses in semi-urban and rural India.
- CIFIC's strength lies in its ability to reach such customers in rural and semi-urban markets and its ability to underwrite and collect from customers whose income streams are relatively less predictable.
- The company is also scaling up in three new segments - Consumer & Small Enterprise Loan, Secured Business & Personal Loan and SME Loan business - which are likely to be additional growth drivers going forward.

*The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

Emerging leader in fluorination

- Established in 1967, NFIL has successfully transitioned its business model from a domestic focused, commoditised inorganic fluoride manufacturer to a well-established specialty chemical and CRAMS player globally
- Fluorination is one of the fastest growing chemistry globally owing to its lipophilic properties which increases the potency and efficacy of formulations. Development capabilities (esp. multi-step) in fluorine have a long gestation period and hence there are only a handful of players in fluorine chemistry globally
- NFIL has seen renewed aggression under the leadership of Radhesh Welling who has more than 25 years of experience in the speciality chemicals industry. Post his joining, the management has created the right incentive structure for employees at all levels to ensure value accretive growth

Structure and Key Terms

Investment Approach	White Oak India Pioneers Equity Portfolio	
Structure	Discretionary Portfolio Management Services	
Portfolio Manager	White Oak Capital Management Consultants LLP	
Investment Objective	The objective of the strategy is to achieve long term capital appreciation by primarily investing in 'listed securities' in India. The investment strategy is long only with a bottom-up stock selection approach. The investment philosophy is, that outsized returns are earned over time by investing in great businesses at attractive values. A great business, in our view, is one that is well managed, scalable, and generates superior returns on incremental capital. Valuation is attractive when the current market price is at a substantial discount to intrinsic value.

Evolving dynamics of external sector

Vulnerability to oil prices lower....

As IT exports have surpassed the oil import bill

- For every US\$10/bbl increase in crude oil prices, it is estimated that CAD to GDP increases by 40bps
- Over the years, growing software exports and narrowing of non-oil trade deficit due to rising exports in engineering goods, electronics and textiles have reduced India's vulnerability to higher crude oil prices
- Initiatives like Production Linked Incentive (PLI) scheme likely to further reduce import dependency in manufacturing sector

Macro- Shacro

20-20 from 2020: The futility of predicting investment returns based on macroeconomic worries and events

Lesson #1

- The usual perennial macroeconomic worries of the well-known unknowns variety are a colossal waste of time
- They hardly influence the future returns from equity markets, if any at all

Lesson #2

- Nobody has a crystal ball to forecast cataclysmic risk events of the unknown unknown variety, ex: the pandemic
- Market implications remain unpredictable even if one were bestowed with perfect prior knowledge

Lesson #3

- Investment decisions bereft of bottom up analysis, and instead driven by macro considerations, are fraught with high risk of substantial absolute and relative losses

The value of the market at any time is present value of aggregate perpetual future cash flows

The market is fairly valued at all times

Relevance of Macro

- View **macros** as source of random risks, **not as opportunity to add alpha**
- Consciously **avoid top-down misadventures** – market timing, sector rotation
- Stay **fully invested**, with a bottom up approach to investing in great businesses at attractive valuations
- Maintain a balanced portfolio construction approach at all times
