Investment Philosophy

Outsized returns can be earned over time by investing in great businesses at attractive valuations

$$\text{Value of a business} = \frac{CF}{r - g}$$

OpcoFinco™ Framework

Investment Philosophy

Aim to avoid businesses with weaker characteristics

Poor corporate governance

Siphoning of cash or value
Manipulation of stock prices
Unethical business practices
Misaligned interests

Examples
Numerous across sectors
Certain commodity companies

Weak returns on incremental capital

Excessive competition in capital-intensive industry
Misallocation of capital
Empire building

Examples
Conglomeration without capabilities

Substitution or obsolescence risk

Existential threat from technological developments

Examples
Print media from online
Wind energy from solar
Combustion engine from electric vehicles

Beware of value traps

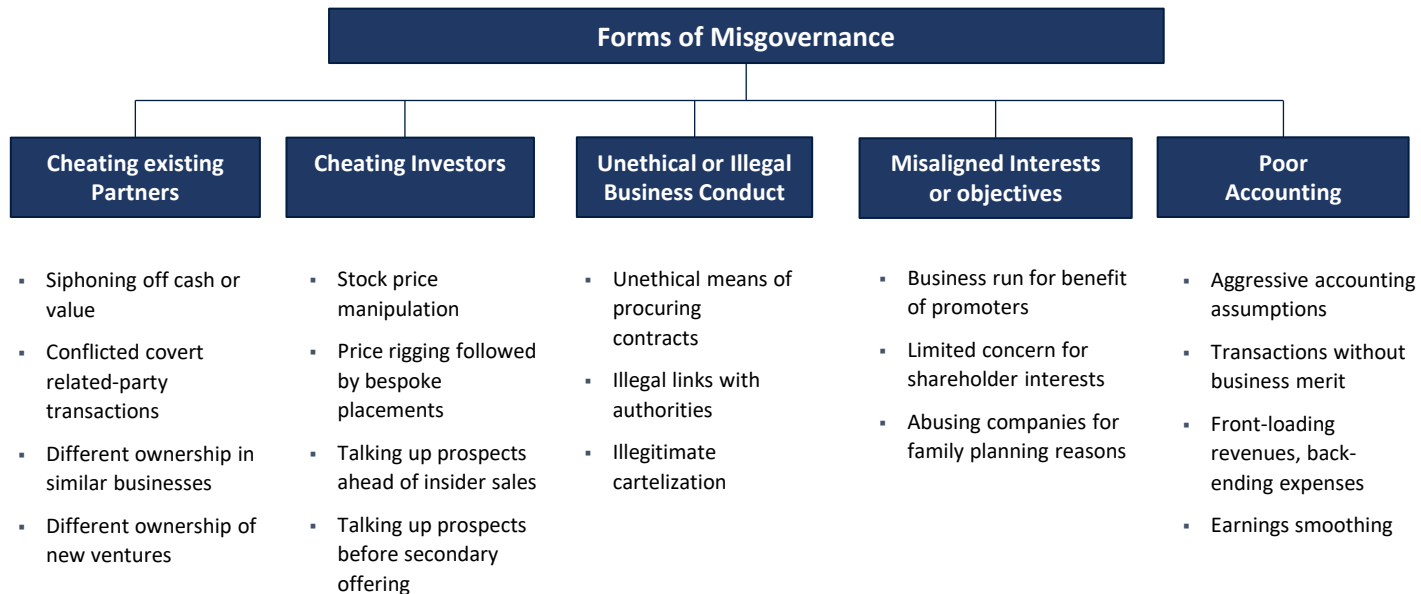

Investment Process

We distil from a broad investible universe

Investment Process

We aim to avoid misgoverned companies

He that lieth down with dogs shall rise up with fleas – Benjamin Franklin

Investment Process

We aim to adhere to a time tested analytical framework in a disciplined manner

Keep perspective of business cycles, rather than accounting years

Portfolio Construction & Risk Management

Portfolio Construction & Risk Management

We aim to ensure performance is a result of skill rather than chance

- **Balanced portfolio** of select companies agnostic to benchmark
- Focus on ensuring alpha generation is a function of **stock selection**
- Aim to consciously **avoid market timing** or **sector rotation** or other such top-down bets
- Understand, monitor, and aim to contain **residual factor risks** that are **by-product of stock selection**
- Typical exposure limits
 - Single stock: 10% at market value
 - Single promoter group: 25%
 - Single industry: 30%

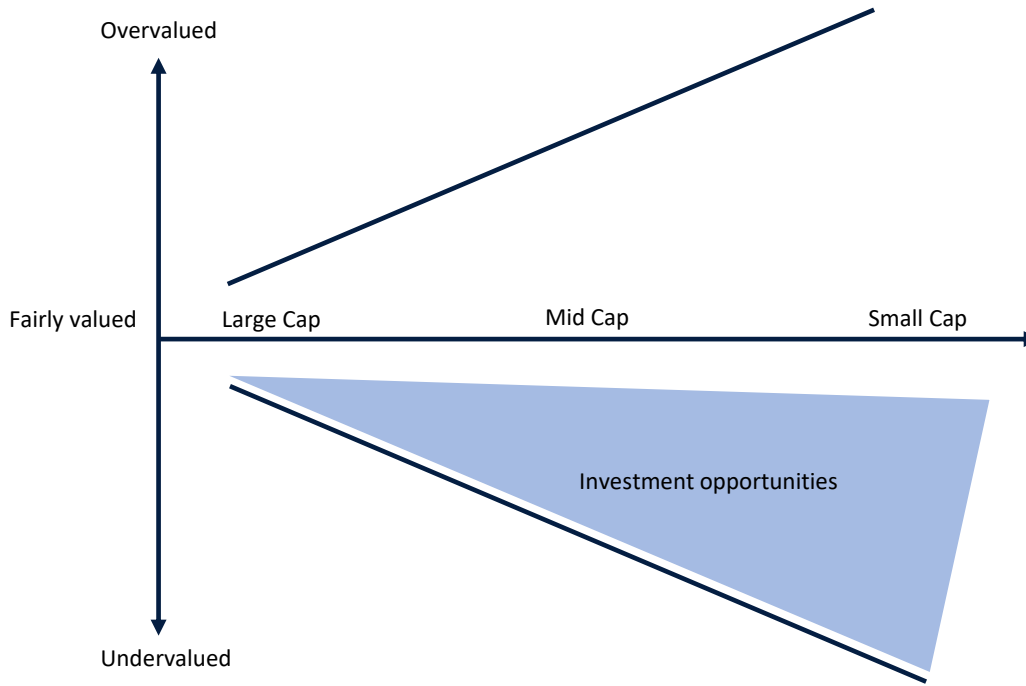

We never forget that in macro, we only have hunches: in the micro, we can develop justifiably deep conviction

- Seth Klarman

Case Studies* - Infoedge

infoedge

India's leading classifieds company

- Infoedge's Naukri.com is India's dominant online jobs portal with 70%+ traffic share. It also owns 99acres.com which is the No. 1 online real-estate classifieds portal with 50% traffic share
- India's low internet penetration provides a long runway of growth for these dominant classified businesses
- Management has an excellent track record of execution. It has also made investments in India's leading food delivery company (Zomato), and India's top online policy aggregator (Policybazar)

*The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

Case Studies* - Navin Fluorine International

Emerging leader in fluorination

- Established in 1967, NFIL has successfully transitioned its business model from a domestic focused, commoditised inorganic fluoride manufacturer to a well-established specialty chemical and CRAMS player globally
- Fluorination is one of the fastest growing chemistry globally owing to its lipophilic properties which increases the potency and efficacy of formulations. Development capabilities (esp. multi-step) in fluorine have a long gestation period and hence there are only a handful of players in fluorine chemistry globally
- NFIL has seen renewed aggression under the leadership of Radhesh Welling who has more than 25 years of experience in the specialty chemicals industry. Post his joining, the management has created the right incentive structure for employees at all levels to ensure value accretive growth

Changing dynamics of external sector

Vulnerability to oil prices lower....

As IT exports have surpassed the oil import bill

- For every US\$10/bbl increase in crude oil prices, it is estimated that CAD to GDP increases by 40bps
- Over the years, growing software exports and narrowing of non-oil trade deficit due to rising exports in engineering goods, electronics and textiles have reduced India's vulnerability to higher crude oil prices
- Initiatives like Production Linked Incentive (PLI) scheme likely to further reduce import dependency in manufacturing sector

Lessons from 2020

Macro- Shacro

20-20 from 2020: The futility of predicting investment returns based on macroeconomic worries and events

Lesson #1

- The usual perennial macroeconomic worries of the well-known unknowns variety are a colossal waste of time
- They hardly influence the future returns from equity markets, if any at all

Lesson #2

- Nobody has a crystal ball to forecast cataclysmic risk events of the unknown unknown variety, ex: the pandemic
- Market implications remain unpredictable even if one were bestowed with perfect prior knowledge

Lesson #3

- Investment decisions bereft of bottom up analysis, and instead driven by macro considerations, are fraught with high risk of substantial absolute and relative losses

White Oak's Perspective

The value of the market at any time is present value of aggregate perpetual future cash flows

The market is fairly valued at all times

Relevance of Macro

- View **macros** as source of random risks, **not as opportunity to add alpha**
- Consciously **avoid top-down misadventures** – market timing, sector rotation
- Stay **fully invested**, with a bottom up approach to investing in great businesses at attractive valuations
- Maintain a balanced portfolio construction approach at all times
