Investment Philosophy

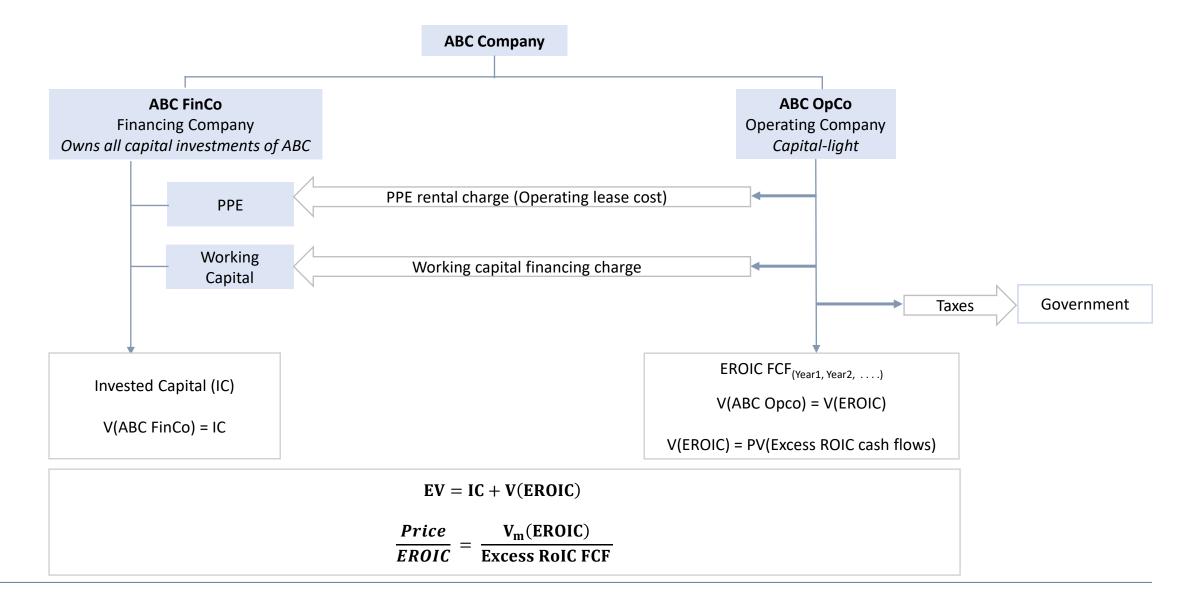

Outsized returns can be earned over time by investing in great businesses at attractive valuations

OpcoFinco™ Framework

Investment Philosophy

Aim to avoid businesses with weaker characteristics

| Poor |
|----------------------|
| corporate governance |

Siphoning of cash or value

Manipulation of stock prices

Unethical business practices

Misaligned interests

<u>Examples</u> Numerous across sectors Certain commodity companies Weak returns on incremental capital

Excessive competition in capitalintensive industry

Misallocation of capital

Empire building

Examples Conglomeration without capabilities

Substitution or obsolescence risk

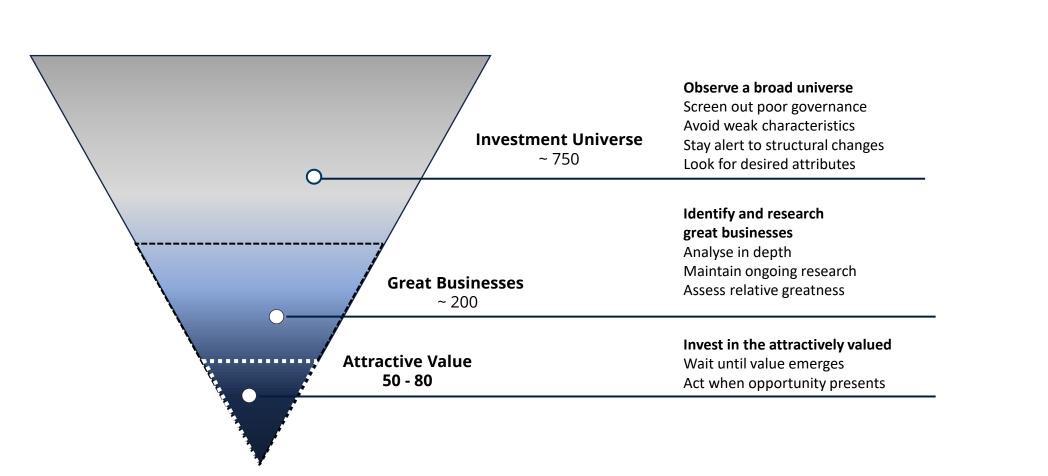

Existential threat from technological developments

Examples Print media from online Wind energy from solar Combustion engine from electric vehicles

Beware of value traps

Investment Process

We distil from a broad investible universe

Investment Process

We aim to avoid misgoverned companies

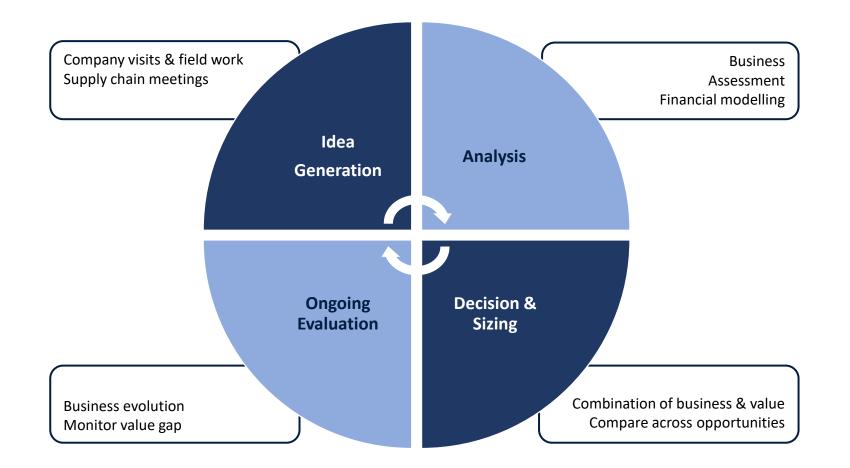

He that lieth down with dogs shall rise up with fleas – Benjamin Franklin

Investment Process

We aim to adhere to a time tested analytical framework in a disciplined manner

Keep perspective of business cycles, rather than accounting years

Portfolio Construction & Risk Management

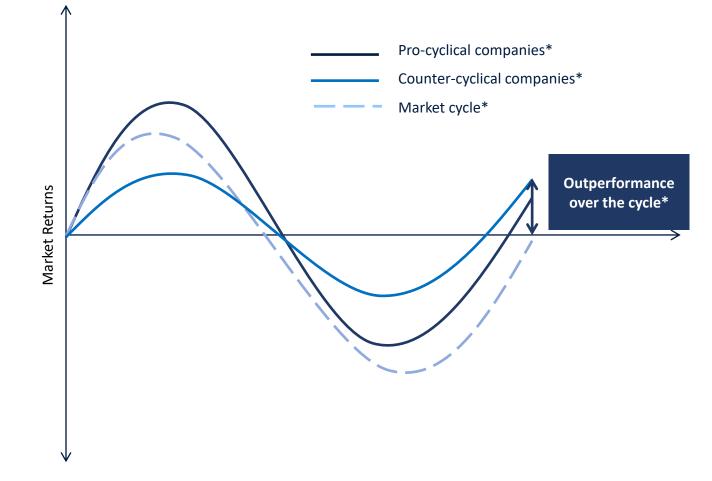

STRICTLY PRIVATE AND CONFIDENTIAL - DO NOT REPRODUCE

Portfolio Construction & Risk Management

We aim to ensure performance is a result of skill rather than chance

- Balanced portfolio of select companies agnostic to benchmark
- Focus on ensuring alpha generation is a function of **stock selection**
- Aim to consciously **avoid market timing** or **sector rotation** or other such top-down bets
- Understand, monitor, and aim to contain residual factor risks that are by-product of stock selection
- Typical exposure limits
 - Single stock: 10% at market value
 - Single promoter group: 25%

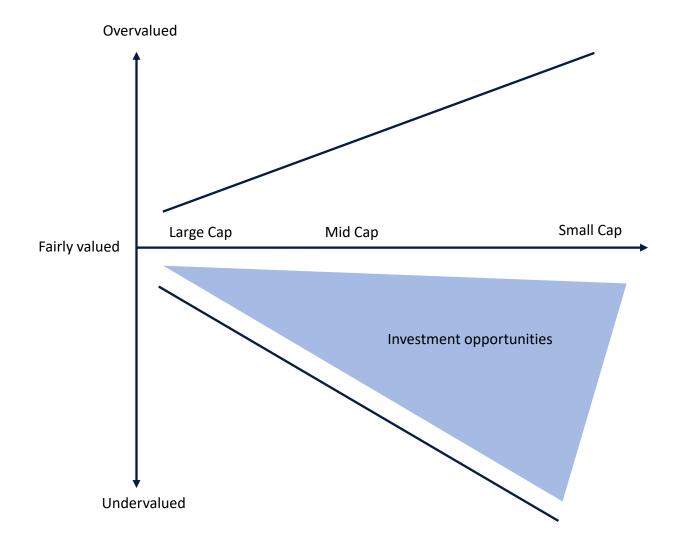

We never forget that in macro, we only have hunches: in the micro, we can develop justifiably deep conviction - Seth Klarman

Opportunity Funnel

Higher inefficiencies in mid and small cap

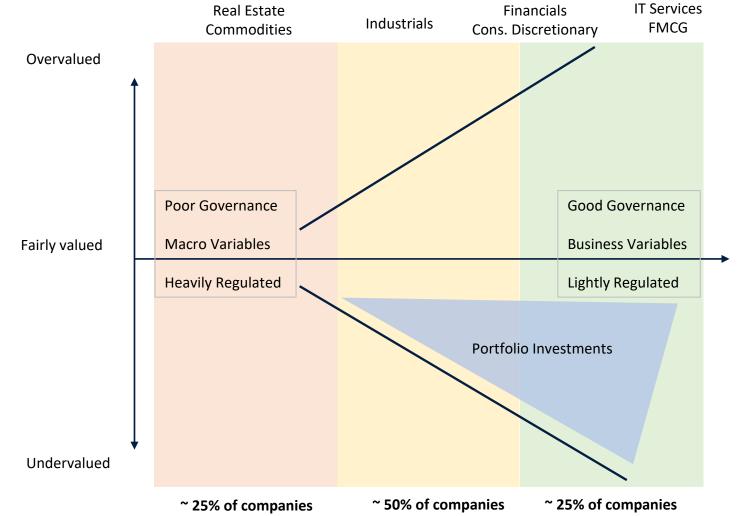

Large, Mid and Small cap categorization as per the Securities and Exchange Board of India

Opportunity Funnel

No sanctity of cash flows or valuations of poorly governed companies

Note:

Graphical representation is for illustration purpose only and not supposed to be precise or accurate.

For example, not all real estate companies are poorly governed, and not all IT Services companies are wellgoverned.

THE ART AND SCIENCE OF INVESTING

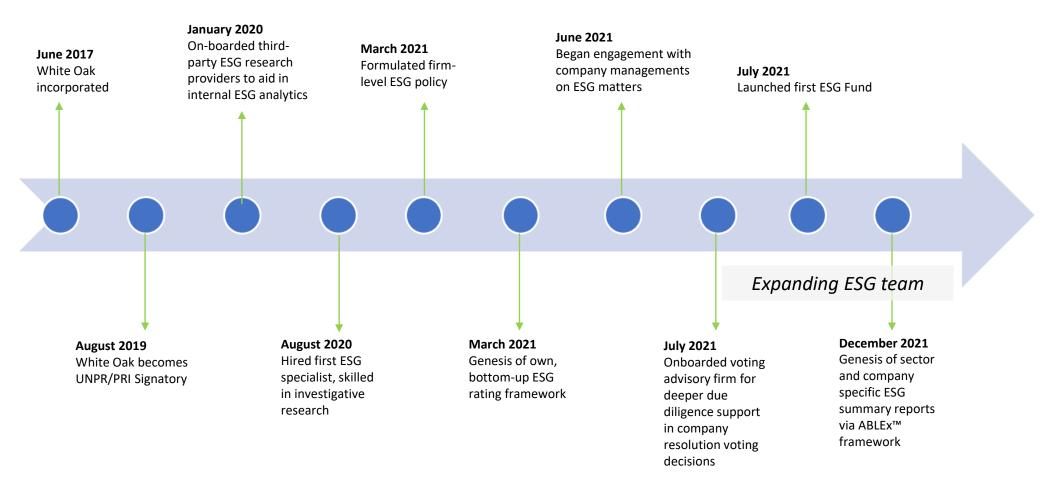

White Oak's ESG Journey

STRICTLY PRIVATE AND CONFIDENTIAL - DO NOT REPRODUCE

Evolution of ESG at White Oak

Roots in deep due diligence in governance assessment is now extended to E&S factors

The PRI is an investor initiative in partnership with UNEP Finance Initiative and UN Global Compact. UN PRI Signatories have committed to invest in a manner that demonstrates their implementation of the Six Principles for Responsible Investment. Signatories are required to report on their responsible investment activities annually by responding to asset-specific modules in the reporting framework. Each module houses a variety of indicators that address specific topics of responsible investment. Signatories are then assessed by PRI and results are compiled into an assessment report to help demonstrate how signatories are meeting these. Module scores are assigned to one of six performance bands, lowest to highest, from E to A+. Methodology and definitions can be found at: https://www.unpri.org/signatories/reporting-and-assessment

Diagnosing India's ESG landscape

Analysis of India's current ESG landscape suggests the way forward for improved ESG culture

| Current Policies and Regulatory Framework | Existing Business Responsibility Statement –Qualitative Business Responsibility & Sustainability Reporting (FY23e) – Quantitative GHG emissions disclosure Mandated Corporate Social Responsibility Spends Policy thrust, Incentives for climate and sustainability goals | | | | | | |
|--|---|--|--|--|--|--|--|
| | Scattered and ad-hoc disclosures of ESG relevant information | | | | | | |
| Challenges | Limited coverage and depth of ESG research in ecosystem | | | | | | |
| | | | | | | | |
| Scope for Improvement | Better awareness of ESG issues, risk management More useful ESG disclosures to track progress Increased dialogue on ESG matters within entire ecosystem | | | | | | |
| | | | | | | | |

Need for engagement focused approach for better awareness, disclosures, practices

Third party ESG research providers have limited coverage of White Oak's investable universe

| Parameter | MSCI | Bloomberg | Sustainalytics |
|---|--|--|---|
| Relevant Data | 35 ESG Key ESG Issue Metrics, Controversies History | Time-series of key ESG metrics | Sector-specific risk exposures, controversies history |
| Insights | Company, Portfolio ESG Ratings, Case Studies | ESG Ratings | ESG Risk Ratings |
| Timeliness | Low | Low | Low |
| Transparency of data sources, analysis | Medium | Low | Low |
| Coverage of Investment Universe | 75% of companies do not have an MSCI ESG Score | 54% of companies do not have a Bloomberg ESG Score | NA |
| Assessment | Broad coverage, but lacks timeliness | Historical data series is more useful for companies that disclose in standardized form | Broad coverage, but lacks depth |

In our view, third party ESG research providers lack depth of coverage and lag in terms of timeliness of updates.

Case Studies: Challenges posed by Third Party ESG Research

Case Study 1: ICICI Prudential Life Insurance

MSCI Evaluation

- January 2022: The insurer was rated a 'B'- second lowest MSCI ESG Rating
- February 2022: ESG Rating upgraded by **three notches** to 'A'- **third highest MSCI ESG Rating**
- This revised MSCI ESG rating lagged the company's disclosures filing by eight months

Case Study 2: Cipla

MSCI Evaluation

 December 2021: MSCI assigned a score of 3.1/10 in the Environmental aspect, claiming "No evidence of environmental targets"

ABLEx[™] Evaluation

White Oak's ESG sector competitor analysis showed ICICI Prudential Life Insurance to have the best disclosures and practices in the industry based on their FY21 ESG report filed in June 2021

Timeliness of updates by third party ESG research providers may pose a concern

ABLEx[™] Evaluation

CIPLA's FY21 Annual Report filed in July 2021 highlighted some key environmental targets such as carbon neutral by 2025, water neutrality by 2025 and zero waste landfill by 2025

We rely on our bottom-up due diligence as third party ESG research may miss key details

Flags and the associated scoring system serve multiple purposes

- Tag and monitor ESG issues
- Identify ESG leaders and laggards
- Evaluate portfolio wide ESG health
- Prioritize and focus on engagement initiatives with company management

Step 3: ESG Factor Score Multipliers

Differential multiplier-based scoring system based on sector-specific considerations of ESG risks

| Example (Banks) | Multiplier* | Rationale |
|---------------------------------------|-------------|---|
| Responsible Credit | 1.5x | ESG issues affect companies, assets, and projects funded, subject to credit risks |
| Opportunities | 1.5x | Financial inclusion to enhance social capital |
| Human Capital | 1.0x | Loss of competitiveness and increased cost owing to high turnover |
| Data Protection | 1.0x | Reputation and legal risk |
| Product Safety/ Mis-selling Risk | 1.0x | Reputation and regulatory risks |
| Energy Efficiency | 1.0x | Efficiency maximization |
| Corporate Social Responsibility (CSR) | 1.0x | Mandated by law |

Arranged in order of importance (high to low)

*Maximum multiplier of 1.5x

Example: Flag Scoring System (Banks)

| Key Issues/ Opportunities | Key Questions | Bank 1 | Bank 2 | Bank 3 | Bank 4 |
|--|--|--------|--------|--------|--------|
| Responsible Credit | Does the bank incorporate ESG considerations in its credit decisions? Disclosures on Green/Sustainable financing? | | | | |
| Opportunities | Products to meet the needs of underserved communities? Microfinance, affordable housing lending | | | | |
| Human Capital | How many employees received training during the year? (% of total) Average training hours trend over the last three years? Has there been an improvement in Diversity? | | | | |
| Data Protection | Is the bank certified by an external agency for its data security related processes? Are employees trained on data security and privacy? Third party audits of IT systems? | | | | |
| Product Safety/ Mis-selling Risk | - Trend in customer complaints over the last three years? | | | | |
| Energy Efficiency | What are the efforts made towards reducing energy consumption? Targets set for reducing energy intensity? | | | | |
| Corporate Social Responsibility (CSR) | Does the bank meet the mandated spends of 2% of Net profit criterion? What are the specific areas of CSR spending? | | | | |

Case Studies* - Cholamandalam Investment and Finance

One of India's leading Non-Banking Finance Companies (NBFCs)

- Cholamandalam Investment and Finance (CIFC) is a non-banking financial company (NBFC) belonging to the Chennai-based Murugappa Group. It primarily operates in vehicle finance (including CVs, PVs, 2W and 3Ws), home equity, and affordable home loans category. In terms of customer profile, it caters predominantly to single truck owners and small fleet owners, self-employed non-professionals and MSME businesses in semi-urban and rural India.
- CIFC's strength lies in its ability to reach such customers in rural and semi-urban markets and its ability to underwrite and collect from customers whose income streams are relatively less predictable.
- The company is also scaling up in three new segments Consumer & Small Enterprise Loan, Secured Business & Personal Loan and SME Loan business which are likely to be additional growth drivers going forward.

^{*}The following case studies are illustrative examples only. The illustrated companies included here may or may not necessarily be held in any portfolio at any time in the past or currently.

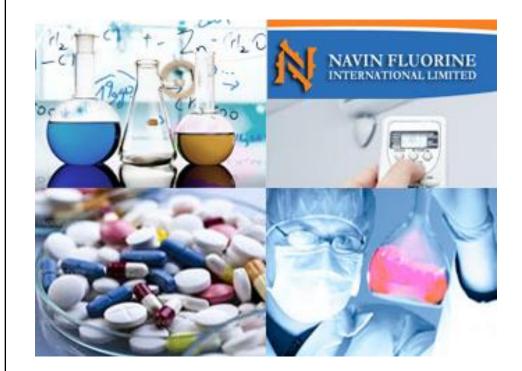

Case Studies* - Navin Fluorine International

Emerging leader in fluorination

- Established in 1967, NFIL has successfully transitioned its business model from a domestic focused, commoditised inorganic fluoride manufacturer to a well-established specialty chemical and CRAMS player globally
- Fluorination is one of the fastest growing chemistry globally owing to its lipophilic properties which increases the potency and efficacy of formulations. Development capabilities (esp. multi-step) in fluorine have a long gestation period and hence there are only a handful of players in fluorine chemistry globally
- NFIL has seen renewed aggression under the leadership of Radhesh Welling who has more than 25 years of experience in the speciality chemicals industry. Post his joining, the management has created the right incentive structure for employees at all levels to ensure value accretive growth

Vulnerability to oil prices lower....

As IT exports have surpassed the oil import bill

- For every US\$10/bbl increase in crude oil prices, it is estimated that CAD to GDP increases by 40bps
- Over the years, growing software exports and narrowing of non-oil trade deficit due to rising exports in engineering goods, electronics and textiles have reduced India's vulnerability to higher crude oil prices
- Initiatives like Production Linked Incentive (PLI) scheme likely to further reduce import dependency in manufacturing sector

Make in India

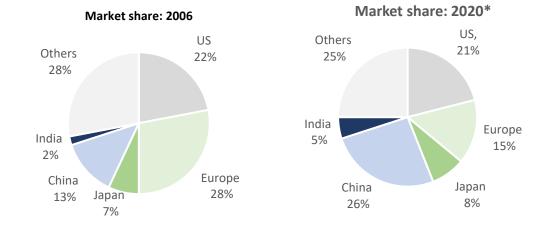

Indian speciality chemicals industry positioned strongly to win global market share

- MNCs seek to diversify procurement away from China
- Covid has exposed global supply chain vulnerability
- China's erstwhile competitive advantages of labour cost, and lax compliance are weakening

Advantage India

- Strong adherence to global manufacturing standards
- Capabilities in complex chemistry
- Strong IP protection

Lessons from 2020

Macro-Shacro

20-20 from 2020: The futility of predicting investment returns based on macroeconomic worries and events

Lesson #1

- The usual perennial macroeconomic worries of the well-known unknowns variety are a colossal waste of time
- They hardly influence the future returns from equity markets, if any at all

Lesson #2

- Nobody has a crystal ball to forecast cataclysmic risk events of the unknown unknown variety, ex: the pandemic
- Market implications remain unpredictable even if one were bestowed with perfect prior knowledge

Lesson #3

• Investment decisions bereft of bottom up analysis, and instead driven by macro considerations, are fraught with high risk of substantial absolute and relative losses

White Oak's Perspective

THE ART AND SCIENCE OF INVESTING

The value of the market at any time is present value of aggregate perpetual future cash flows

The market is fairy valued at all times

Relevance of Macro

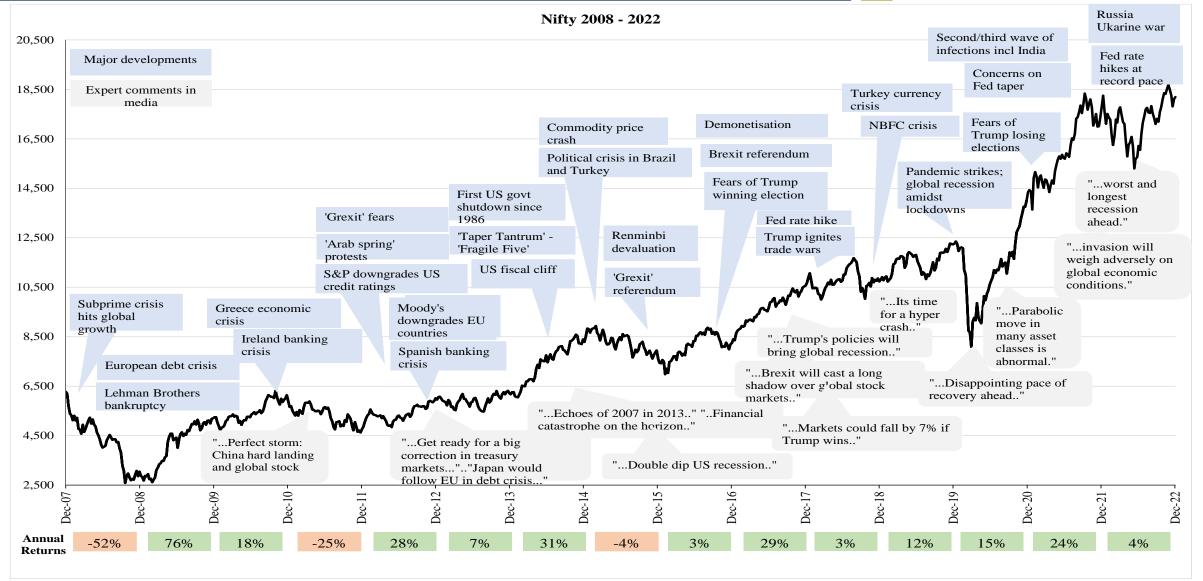

- View macros as source of random risks, not as opportunity to add alpha
- Consciously avoid top-down misadventures market timing, sector rotation
- Stay fully invested, with a bottom up approach to investing in great businesses at attractive valuations
- Maintain a balanced portfolio construction approach at all times
